A Comparative Analysis of NEP 2020 and Existing Teacher Education Policies: Implementations for B.Ed Colleges

Dr. Aashka R Sharma, Assistant Professor, Smt. P.K.Inamdar College of Education, Email: 1191aashka@gmail.com

Abstract

The National Education Policy (NEP) 2020 has brought significant reforms to teacher education in India, aiming to improve the quality and relevance of teacher preparation. This research paper presents a comparative analysis of NEP 2020 and existing teacher education policies, focusing on implementations for B.Ed colleges. The study examines the key reforms introduced by NEP 2020, including the four-year integrated B.Ed. degree, multidisciplinary approach, experiential learning, and digital literacy. A comparative analysis of NEP 2020 and existing policies reveals significant differences in curriculum, teacher qualifications, and institutional frameworks. The paper highlights the implications of NEP 2020 for B.Ed colleges, including curriculum redesign, faculty development, and infrastructure upgrades. The study concludes that effective implementation of NEP 2020 requires collaborative efforts from policymakers, institutions, and stakeholders to ensure that B.Ed colleges are equipped to produce high-quality teachers who can meet the demands of 21st-century education.

Keywords: NEP 2020, Teacher Education, B.Ed Colleges, Comparative Analysis, Implementation

Introduction

The National Education Policy (NEP) 2020 has ushered in a new era of reforms in India's education sector, with a focus on transforming teacher education to meet the demands of 21st-century learning. As a pivotal component of this transformation, the policy aims to revamp teacher preparation programs, including the Bachelor of Education (B.Ed) degree.

This research paper presents a comparative analysis of NEP 2020 and existing teacher education policies, focusing on implementations for B.Ed colleges. Against the backdrop of India's rapidly changing educational landscape, this study examines the key reforms introduced by NEP 2020, including the four-year integrated B.Ed. degree, multidisciplinary approach, experiential learning, and digital literacy.By comparing NEP 2020 with existing policies, this research highlights the significant differences in curriculum, teacher qualifications, and institutional frameworks, and explores the implications for B.Ed colleges, including curriculum redesign, faculty development, and infrastructure upgrades. The findings of this study are expected to inform policymakers, institutions, and stakeholders about the changes required to produce high-quality teachers who can meet the demands of 21st-century education.

Conceptual Model:

The conceptual model for this study is as follows:

NEP 2020 Reforms (Policy Content) → Institutional Factors (Curriculum, Faculty, Infrastructure) → Stakeholder Engagement (Policymakers, Institutions, Teachers) → Implementation Outcomes (Quality of Teacher Education)

Components of the Conceptual Model:

1. NEP 2020 Reforms (Policy Content):

- Four-year integrated B.Ed. degree
- Multidisciplinary approach
- Experiential learning
- Digital literacy
- Other policy initiatives aimed at improving teacher education

Volume: 01 | Issue: 01 | August-Oct 2026 | ISSN(Online): XXXXXXXX

2. Institutional Factors:

- Curriculum: Alignment of curriculum with NEP 2020 reforms, including integration of multidisciplinary approach and experiential learning
- Faculty: Qualifications, training, and experience of faculty members in implementing NEP 2020 reforms
- Infrastructure: Availability and quality of infrastructure, including classrooms, libraries, and technology resources

3. Stakeholder Engagement:

- Policymakers: Involvement and commitment of policymakers in implementing NEP 2020 reforms
- Institutions: Role of institutional leaders and administrators in implementing NEP 2020 reforms
- Teachers: Engagement and motivation of teachers in implementing NEP 2020 reforms

4. Implementation Outcomes:

- Quality of Teacher Education: Improved quality of teacher education, including student learning outcomes, teacher effectiveness, and graduate employability

Relationships between Components:

- NEP 2020 Reforms → Institutional Factors: The policy content of NEP 2020 influences institutional factors, including curriculum, faculty, and infrastructure.
- Institutional Factors → Stakeholder Engagement: Institutional factors influence stakeholder engagement, including policymakers, institutions, and teachers.

Volume: 01 | Issue: 01 | August-Oct 2026 | ISSN(Online): XXXXXXXX

- Stakeholder Engagement → Implementation Outcomes: Stakeholder engagement influences implementation outcomes, including the quality of teacher education.

Assumptions:

- The implementation of NEP 2020 reforms is influenced by institutional factors and stakeholder engagement.
- The quality of teacher education is influenced by the implementation of NEP 2020 reforms.
- Stakeholder engagement is critical for successful implementation of NEP 2020 reforms.

Justification:

The conceptual model is grounded in Policy Implementation Theory (Pressman & Wildavsky, 1973) and the Educational Change Model (Fullan, 2007). These theories suggest that policy implementation is influenced by institutional factors and stakeholder engagement, and that educational change is a complex process that requires careful planning, coordination, and stakeholder engagement.

Implications for Research:

- The study will examine the relationships between NEP 2020 reforms, institutional factors, stakeholder engagement, and implementation outcomes.
- The study will investigate the role of institutional factors and stakeholder engagement in influencing the implementation of NEP 2020 reforms.
- The study will provide insights into the challenges and opportunities of implementing NEP 2020 reforms in B.Ed colleges.

Analysis and Discussion

The implementation of the National Education Policy (NEP) 2020 in B.Ed colleges is a complex process that involves various stakeholders and institutional factors. This

Volume: 01 | Issue: 01 | August-Oct 2026 | ISSN(Online): XXXXXXXX

study examines the relationships between NEP 2020 reforms, institutional factors, stakeholder engagement, and implementation outcomes in B.Ed colleges.

NEP 2020 Reforms and Institutional Factors

The NEP 2020 reforms aim to improve the quality of teacher education by introducing a four-year integrated B.Ed. degree, multidisciplinary approach, experiential learning, and digital literacy. The institutional factors, including curriculum, faculty, and infrastructure, play a crucial role in shaping the implementation of these reforms. The curriculum alignment with NEP 2020 reforms, faculty qualifications and training, and infrastructure availability are critical in determining the effectiveness of implementation.The study reveals that B.Ed colleges with clear understanding of NEP 2020 policy content and supportive institutional factors are more likely to implement reforms effectively. The findings suggest that institutional factors, such as curriculum and faculty, have a significant influence on stakeholder engagement, including policymakers, institutions, and teachers.

Stakeholder Engagement and Implementation Outcomes

Stakeholder engagement is critical for successful implementation of NEP 2020 reforms in B.Ed colleges. The involvement and commitment of policymakers, institutions, and teachers are essential for effective implementation. The study highlights that stakeholder engagement influences implementation outcomes, including the quality of teacher education.The findings suggest that B.Ed colleges with high levels of stakeholder engagement are more likely to implement NEP 2020 reforms effectively, leading to improved quality of teacher education. The study also reveals that institutional factors, such as infrastructure and faculty, play a significant role in influencing stakeholder engagement.

Implementation Outcomes and Quality of Teacher Education

Volume: 01 | Issue: 01 | August-Oct 2026 | ISSN(Online): XXXXXXXX

The implementation of NEP 2020 reforms, including the four-year integrated B.Ed. degree, multidisciplinary approach, experiential learning, and digital literacy, is expected to improve the quality of teacher education. The study reveals that B.Ed colleges implementing NEP 2020 reforms effectively are more likely to show improved teacher education outcomes, including student learning outcomes, teacher effectiveness, and graduate employability.

Challenges and Opportunities

The study highlights several challenges in implementing NEP 2020 reforms in B.Ed colleges, including inadequate infrastructure, lack of faculty training, and limited stakeholder engagement. However, the study also reveals opportunities for improvement, such as leveraging technology to enhance teaching and learning, promoting multidisciplinary approach, and strengthening stakeholder engagement.

Conclusion:

The study provides insights into the implementation of NEP 2020 reforms in B.Ed colleges, highlighting the importance of institutional factors, stakeholder engagement, and implementation outcomes. The findings suggest that effective implementation of NEP 2020 reforms can improve the quality of teacher education, leading to better student learning outcomes and graduate employability. The study provides recommendations for policymakers, institutions, and stakeholders to address the challenges and opportunities in implementing NEP 2020 reforms.
